The quota calculator

- Follows the capacity status of wind power feed-in tariff system
- Located at <https://tuotantotuki.emvi.fi>
- Shows the share of the total capacity that has already been filled based on acceptance decisions and the reservations to the quota made through valid quota decisions
- Also shows the nominal capacity of quota applications and acceptance applications being processed, the remaining free capacity, and the nominal capacity of those power plants that have submitted only the advance notification to the SATU system.
- Real-time data: calculator is automatically updated whenever new applications affecting the total capacity are submitted or decisions are passed

Kokonaiskapasiteetti (kVA) 	2 500 000,00	100,00 %
Syöttötariffijärjestelmään hyväksytyt (kVA) 	710 807,42	28,43 %
Voimassa olevat kiintiöpäätökset (kVA) 	66 023,00	2,64 %
Käsittelyssä olevat hyväksymishakemukset (kVA) 	13 332,00	
Käsittelyssä olevat kiintiöhakemukset (kVA) 	63 430,00	
	853 592,42	
Ennakoilmoitukset (kVA) 	288 571,00	

The total nominal capacity accepted to the feed-in tariff system (kVA)

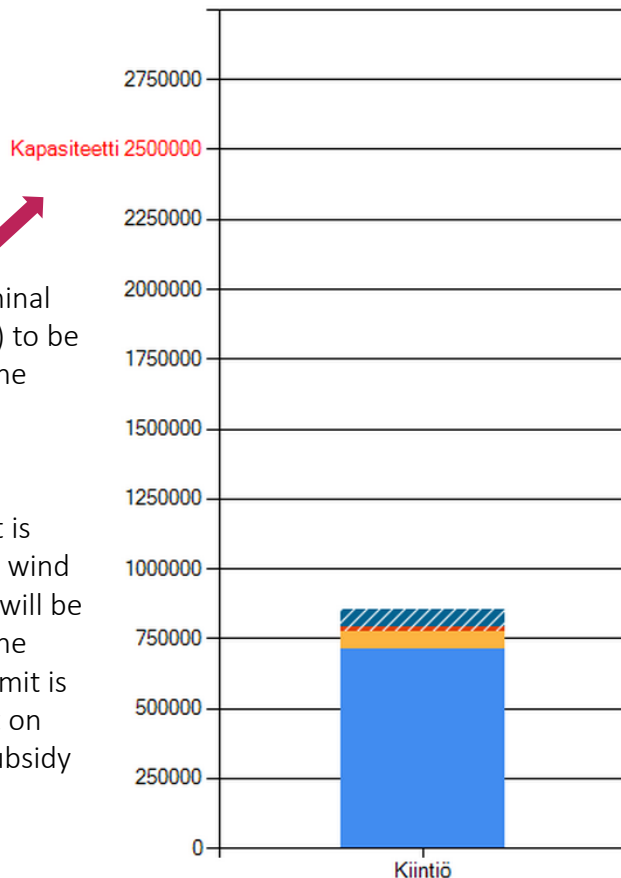

Accepted to the feed-in tariff system (kVA)

Valid quota decisions (kVA)

Submitted acceptance applications being processed (kVA)

Submitted quota applications being processed (kVA)

Advance notifications (kVA)

-  Syöttötariffijärjestelmään hyväksytyt
-  Voimassa olevat kiintiöpäätökset
-  Käsittelyssä olevat hyväksymishakemukset
-  Käsittelyssä olevat kiintiöhakemukset

-  Accepted to feed-in tariff system
-  Valid quota decisions
-  Submitted acceptance applications being processed
-  Submitted quota applications being processed

The total nominal capacity (kVA) to be accepted to the feed-in tariff system.

After the limit is met, no more wind power plants will be accepted to the system. The limit is set by the Act on Production Subsidy (1396/2010).

← Filled and reserved capacity (solid colors)
Capacity of submitted applications (striped colors)

Kiintiölaskuri

Käsittelyssä olevat kiintiöhakemukset (kVA) 

Ennakoilmoitukset (kVA) 

Accepted to feed-in tariff system (kVA)

The nominal capacity of the wind power plants accepted into the feed-in tariff system.

Valid quota decisions (kVA)

The nominal capacity of the wind power plants with a legally valid quota decision. Once the wind power plant is accepted into the feed-in tariff system, the nominal capacity is moved into the "Accepted to feed-in tariff system" category.

Submitted acceptance applications being processed (kVA)

The nominal capacity of the wind power plants with a submitted acceptance application in process. Category does not include the wind power plants with a legally valid quota decision. They are included in the "Valid quota decisions" category.

Submitted quota applications being processed (kVA)

The nominal capacity of the wind power plants with submitted quota applications in process. If a wind power plant has both quota and acceptance applications in process, the nominal capacity is included in the "Submitted acceptance applications being processed" category.

Advance notifications (kVA)

The nominal capacity of the wind power plants that have submitted only the advance notification. Advance notification must be filed within one month of their decision to build the power plant.
